DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 7 rejected under 35 U.S.C. 102(b) as being anticipated by Woodford (3678713).

Woodford (3678713) teaches the textile machine as claimed including at least one dust removal device containing at least one electrostatically chargeable collector element (17). See column 4, line 8-22. Also note the means for removing dust (20) collected with the dust collector element (17). Regarding claims 2 and 7, note the knitting machine (2) and thread feed devices (13).

Allowable Subject Matter

Claims 3-6 and 8-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
